

## Awaken Your Inner Light

---

How to consciously evolve in challenging times (August 2025)

**You are the light of the world.** The one thing you cannot doubt is that you are conscious. You are the mystery. You are the subject and cannot make yourself an object. An emanation of God. You are what you are looking for.

**I Am. Unconditioned consciousness.** In evolution. Wisdom can see the whole. The mind cannot. Love is the realization of being.

Challenges are the pathway to conscious evolution. **To find the deeper dimension of who you are. It's the only way.** Your essential identity is the Light of the world. **Fear interferes with your conscious awareness.** Our greatest challenge comes from within, our minds. You need respond from a high vibration.

The light of consciousness needs to grow. The universe is becoming more conscious. Awakening will become easier. Our job is to help one another to become more conscious. **Fear not. Welcome whatever life brings.**
